Re: High priority snow clearing program

We would like to say how impressed we were with this program and your crews. (Especially with a winter like this.) We were not aware that a program like that was out there. The service has been fantastic. The snow was cleared overnight or by mid-morning, after heavier snow falls, at the latest.

On the initial visit the crew cleared the snow to concrete and brought down the high piles of snow in the front yard and blew that further into the yard. On another visit they did the same in the back yard.

One day, inside the garage, Will was scraping the "muck the car brought in from the street" when two of the crew arrived. They saw this and said, "We'll do that." It was very much appreciated. They continued to scrape down to concrete at the entrance where they had to move large chunks of packed snow, a very hard working crew.

We offer a big thank you to all your crews that worked so hard. We were always able to get out for appointments.

Sincerely
Will & Lillian Szepertycki
